This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

EDITOR'S PREFACE.

THIS volume of the Catalogue of Greek Coins in the British Museum contains the coins of Corinth and of those cities of Southern Italy, Sicily, and Western Greece, which, either because they were Corinthian Colonies, or for more commercial reasons, assimilated their currency to that of Corinth.

In the Introduction, which, like the body of the work, has been written by Mr. Barclay V. Head, will be found (i) a historical sketch of the rise and development of the coinage of Corinth, and an attempt to arrange the various series in chronological order from the commencement of the coinage, *circ.* B.C. 650, down to the destruction of Corinth in B.C. 146; (ii) an account of the coinage of the Roman Colony of Corinth from the time of Julius Caesar to the reign of Geta when it finally ceases; and (iii) a geographical and chronological classification of the quasi-Corinthian coinages of Italy, Sicily, Illyria, Epirus, Corcyra, and Acarnania, based upon the lines already laid down by Dr. F. Imhoof-Blumer in his paper *Die Münzen Akarnaniens* in the *Numismatische Zeitschrift*, X., 1878.

In the text of that portion of the Catalogue in which the various issues of Corinth itself are described the series of staters bearing letters and symbols are arranged throughout in alphabetical order for convenience of reference, but in the Introduction a chronological classification has been attempted, the alphabetical arrangement being repeated in each successive period, a system which is also carried

out on the Plates. The student can thus more easily trace minute changes of style which could not have been otherwise rendered intelligible.

The Metal of each coin is stated, and its size in inches and tenths, and the weight of the silver coins is given in English grains. Tables for converting grains into grammes and inches into millimètres, as well as into the measures of Mionnet's scale, are placed at the end of the volume. I have carefully revised the work, comparing each coin with the corresponding description.

REGINALD STUART POOLE.

INTRODUCTION.

PART I. CORINTH.

Few series of coins present greater difficulties of classification than those of Corinth and of the various towns, chiefly Corinthian Colonies, in Acarnania, Corcyra, Epirus, Illyria, Bruttii, and Sicily, which either for political or commercial reasons made use of the Corinthian coin-types.

The currency of many of these latter cities has already been dealt with by Dr. Imhoof-Blumer in his exhaustive treatise on the Coinage of Acarnania. Little therefore remains to be added by way of comment to this portion of our subject.

The difficulties with which we are confronted in attempting to arrange in chronological order the silver coins of Corinth herself, which are always to be distinguished by the presence of the letter ϙ, arise from the generally invariable character of the types. With the exception of the most archaic coins, which have an incuse device upon the reverse (pl. i.), the Pegasos and the Head of Pallas, are the constant types of the Corinthian staters throughout the whole of the fifth and fourth and during the greater part of the third centuries B.C. It is true that from the latter part of the fifth century onwards the coins generally bear, in addition to the main type, an adjunct symbol; but these symbols are usually either of so simple a nature, *e. g.* dolphins, tridents, floral devices, vases, wreaths, or other chiefly inanimate objects, or else they are on so small a scale, when the human form is represented, that, with a few excep-

tions, they render us but little assistance in fixing the dates of the coins on which they occur. Another element of uncertainty arises from the fact that old obverse dies sometimes continued to be used in combination with various reverses, the latter occasionally of later date.

§ 1. *Period I.* *Circ.* B.C. 650—500.

Earliest coins of the flat fabric, probably of the age of Cypselus, B.C. 657—625.

It seems in the highest degree improbable that a great trading city like Corinth can have been behind Athens (circ. B.C. 594), or much behind Aegina, in adopting such a useful invention as coined money. We may therefore, I think, safely assume that the earliest Corinthian coins date from the seventh century B.C., and from the large number of specimens of different dies which have come down to us it is evident that this coinage must have lasted a long time.

Incuse reverse identical with the earliest Aeginetan coins of the 7th cent. B.C.

If, therefore, Corinth began to coin money soon after Aegina and before Athens, the earliest specimens (pl. i. 1) may even belong to the time of Cypselus, B.C. 657—625. It is noteworthy that the incuse of the reverse is here identical with that of some of the very

this Maeander pattern was replaced by animal forms, a portion of it, now usually called the 'Swastika' ornament, was retained to fill up vacant spaces in the field of the vase. All the vases which exhibit this device date from about B.C. 600—550. The 'Swastika' ornament on vases was after a time replaced by the rosette, which was probably developed out of it; and Mr. Murray informs me that he knows of no example of a 'Swastika' on vases of a later date than circ. B.C. 550.

Development of the 'Swastika' pattern out of geometrical Maeander pattern on vases, circ. B.C. 600.

Here then we have a valuable indication of date for our coins. The 'Swastika' as a reverse type must have been adopted during the period in which it was customary to make use of it on vases, that is to say, about B.C. 600, or rather earlier, and it comes to an end on the coins certainly not later than B.C. 500.* On vases, as we have seen, it ceases to be used at an earlier date; but as a coin-type, owing to the conservatism inevitable in the case of a well-established currency like that of Corinth, it may have lasted perhaps down to the close of the sixth century, although it is quite possible that it may have been abandoned somewhat earlier in favour of the head of Pallas.

The weight standard of the coins of Corinth is the Euboïc, that is to say, the standard coin is a stater of 135 grs. But the system of division by 3 and 6 marks it out as a special variety, and seems to point to Asia Minor as the source from which Corinth derived the custom of coining money. It is possible also that this method of dividing the stater by 3 instead of by 2 may have been deliberately adopted with the object of facilitating exchange between the Corinthian money and the Aeginetan, for

Euboïc standard adopted by Corinth. Division of the stater by 3 and 6.

* There are a few coins of manifestly later date (cf. pl. v. 21), which have the 'Swastika,' but these are merely instances of reversion to an extinct type.

the Aeginetan ½ stater or drachm of 48 grs. was practically interchangeable with the Corinthian ⅓ stater or drachm of 45 grs.

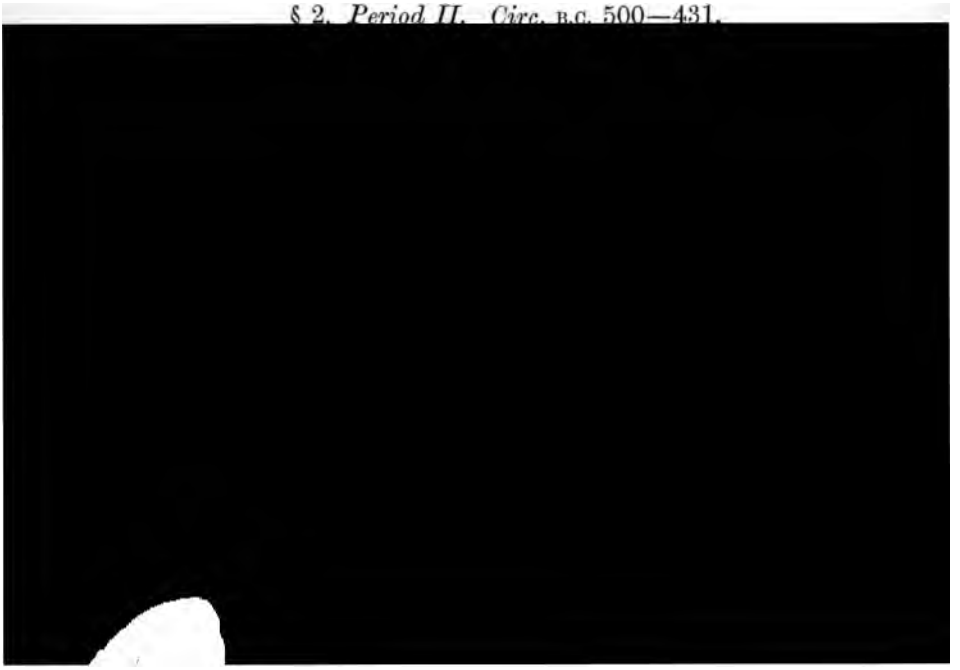
The denominations of Corinthian coins in Period I. before B.C. 500 are the following:—

	Max.	Min.	Normal	Type		Plate
Stater	136·6—	122·2	135	Pegasos	I.	1—6
Drachm or Trite...	45·6—	35·2	45	„	„	7—9
Hemidrachm	22·9—	18·0	22·5	Forepart of Pegasos	„	10
Obol	7·6—	5·5	7·5	Pegasos	„	11—12
Hemiobol	4·0—	3·5	3·75	Head of Pegasos	„	13

Types of earliest staters.

On all the coins represented on pl. i. Pegasos is bridled and has curled or rounded wings. He is either walking, as on Nos. 2 and 3, where the ground is shown by a line, or flying without any indication of ground beneath him. On the earliest specimens (pl. i. 1—2) the chest of the animal is thickly studded with dots.

§ 2. *Period II. Circ.* B.C. 500—431.



The weights of the coins remain the same as in the earlier period, but there are two new denominations: the Diobol, 14·10 grs., distinguished by the mark of value Δ, and the Trihemiobol, 11·25 grs. marked TPIH. The Hemiobol also bears a mark of value H.

New denominations and varieties of type.

The Pegasos is still represented bridled and with curled wing. The features of the goddess on the reverse are of archaic style, the hair is usually dotted and tied in queue, and the helmet generally small compared with the size of the head (cf. pl. ii. 4, 5). The Gorgon-heads on the Trihemiobols (pl. ii. 16, 17) differ from those which I have assigned to Period IV. (pl. v. 19, 20), in that they are of archaic style and have the tongue protruded.

The following are the denominations in Period II.:

Stater	Pegasos	*Rev.*	Head of Pallas	Pl. II.	1—7
Drachm	Pegasos	„ (α)	Head of Aphrodite	„	8—9
		(β)	„ Pallas	„	10—11
Hemidrachm .	Fore-part of Pegasos	„ (α)	„ Aphrodite	„	12
		(β)	„ Pallas	„	13
Diobol	Neck and head of Pegasos	„	Δ	„	14—15
Trihemiobol...	Pegasos	„	TPIH Gorgoneion	„	16—17
[Obol wanting]					
Hemiobol.....	Head of Pegasos	„	H	„	18

§ 3. *Period III.* *Circ.* B.C. 431—400.

This is the period of early fine art. On the head of Pallas (pl. ii. 19) the hair is still arranged in the archaic fashion, but the eye is in profile for the first time. Figs. 20 and 21 exhibit greater freedom of style, and the helmet is duly proportioned to the size of the head. On fig. 21 the helmet also shows beneath it the leather cap which is wanting on all the earlier coins.

Development of style.

Symbols in the field now begin to make their appearance, though at first they are of rare occurrence. The denominations in this period are the Stater; Trihemidrachm (fig. 22), type, Bellerophon on Pegasos *rev.* Chimaera; the Drachm *obv.* Pegasos, *rev.* Head of Aphrodite; and the Diobol *obv.* Pegasos, *rev.* **ΔΙΟ** Prancing Pegasos. The Trihemidrachm is a very unusual denomination, and was probably adopted as being the equivalent of the Attic drachm. It appears to have been coined at Corinth on two occasions only, first of all in this period (fig. 22), where Bellerophon is naked and bare-headed, and again after the lapse of more than half a century (pl. xii. 28), where he wears a petasos and chlamys.

First appearance of adjunct symbols.

The Drachms (figs. 23, 24) show a well-marked advance in style (cf. figs. 8, 9), the hair of the goddess being now rolled round the diadem.

The Diobol appears with new types (figs. 25, 26), and with the mark of value written at greater length **ΔΙΟ**.

As a general rule the archaic type of Pegasos with curled wing and bridle is still preserved, but the pointed wing is occasionally met with.

The Pegasos is usually represented flying with pointed wings, but specimens are now and then met with on which the animal is seen standing with bridle hanging loose (pl. iv. 9), or drinking from the sacred spring of Peirene (pl. v. 1), or standing with curled wings and bridle attached to a ring fixed in the wall above him (pl. iii. 21), or again walking with curled wings (pl. iv. 10, 13), evidently a reversion to the ancient type (cf. pl. i. 2, 3), from which it is, however, distinguishable by style.

Tendency towards conventionality in the types of the stater, but greater variety in those of the drachms, &c.

These exceptional varieties from the ordinary type are probably due to the artistic activity of die-engravers striving to escape from the bonds of conventionality, a praiseworthy attempt which would seem, however, to have met with only a temporary success, for, with the few exceptions above referred to, the mass of the coinage is more or less uniform in type. This tendency to a stereotyped conventionality of treatment, though less marked than on the coins of Athens, is perhaps to be accounted for by the fact that the types do not, like those of Tarentum, for instance, afford much scope for variety of design. The head of Aphrodite on the drachms and half-drachms (pl. v. 7—14) seems to lend itself more readily to the imagination of the artist, who here feels himself free to vary the arrangement of the hair and the fashion of the head-dress according to the dictates of his fancy. So numerous indeed are the varieties of the female head on the drachms and hemidrachms, that it may be seriously questioned whether they were all intended for Aphrodite: for instance, the full-face head with flowing hair (pl. v. 15), a type which seems to have been suggested by Kimon's famous Arethusa, on a tetradrachm of Syracuse (B.M. *Guide*, pl. xxv. 30), was probably meant to represent the Fountain nymph Peirene.

The smaller denominations in this period are Diobols (pl. v. 16—18), type, Pegasos on both sides; Trihemiobols (pl. v. 19, 20), *obv.*

Pegasos, *rev.* Gorgon-head, with mouth closed, of softer style than those of the earlier period (pl. ii. 16, 17); and obols of two types, the 'Swastika' (pl. v. 21), and the Trident (pl. v. 22).

The staters of this period are almost always provided with a symbol in the field, here as elsewhere doubtless a Magistrate's signet. The majority of these symbols are of the conventional kind, which call for no remark, but there are one or two which are apparently copies of statues, e.g. the naked male figures of archaic style standing on a basis, which I have ventured to describe as Poseidon wielding trident and holding dolphin on extended hand (pl. iv. 13), and as Zeus holding a transverse sceptre and a thunderbolt (pl. iv. 14, 15).

Remarkable symbols.

§ 5. *Series with initials of Magistrates and Symbols.*

About B.C. 400, or perhaps even a little earlier, letters, which we may assume to be Magistrates' initials, begin to appear on the Pegasos staters, in combination with the symbol, which is frequently varied, during the tenure of office of the magistrate whose name apparently is indicated in abbreviated form.

First occurrence of letters in combination with symbols.

Approximate chronological sequence of the lettered series.

attention to minute details of style and fabric. The following appear to me to be, roughly speaking, the periods into which these lettered series fall. They commence, it will be seen, about the close of the fifth century and extend probably down to B.C. 243, when Corinth became a member of the Achaean League. They are thus in part contemporary with the series above described (§ 4.) with symbols only but without magistrates' initials, the practice of adding the initials of the chief magistrate having been in the first instance exceptional, and increasing in frequency as time went on.

In B.C. 243 Corinth was delivered from the Macedonian rule by Aratus, and it then became a member of the Achaean League and, presumably, ceased to strike money independently of that of the League. For descriptions of the League coins see *Cat. Peloponnesus*, pp. 3, 12.

No Corinthian silver Coinage after B.C. 243 except of the Achaean Federal type.

Twenty years after this time (B.C. 223) Corinth was surrendered by the League to Antigonus Doson, and continued to be a Macedonian stronghold until B.C. 196, when the Romans once more united it to the Achaean League. There is no evidence however to show that it ever enjoyed the right of coinage after B.C. 243, when it was first liberated by Aratus.

§ 6. *Bronze Coins.*

The bronze coinage of Corinth begins about the same time as that of Athens, that is to say about the close of the fifth century.

It may be divided roughly into two periods (i) B.C. 400—300, (ii) B.C. 300—243.

Period I. Circ. B.C. 400—300.

To this period we may attribute the series of small coins weighing from about 28 to 30 grs. *Obv.* Pegasos, *rev.* Trident. (Pl. xiv. 1—6.)

Bronze coins with letters and symbols as on silver coins.

As the adjunct symbols and letters on the coins of this series correspond very frequently with the symbols and letters on the silver money, there can be no doubt that they are contemporary issues.

The following symbols are common both to bronze and silver:

Æ Tripod	cf. Ar	EY Tripod	B.C. 400–350
Æ Dolphin	,,	⋚ Dolphin	,,
Æ Race-torch (Pl. XIV. 3)	,,	E Race-torch	,,
Æ Ivy-leaf	,,	AP Ivy-leaf	B.C. 350–338
Æ Star	,,	I Star	,,
Æ Three crescents in circle	,,	N Three crescents in circle	,,

Æ AΛ Bacchic mask	cf. Æ AΛ Bacchic mask		B.C. 350–338
Æ Δ Phiale	„ Δ or ΔI Phiale		„
Æ Δ Krater	„ Δ Krater		„
Æ ∇ Head of Helios	„ Δ Head of Helios		„
Æ Pallas holding Nike	„ ΔI Pallas holding Nike		B.C. 338–300
Æ Figure holding cornucopiae	„ ΔI Figure holding cornucopiae		„
Æ Δ Amphora	„ ΔI Amphora		„

To the close of this period, circ. B.C. 338—300, belong also the larger bronze coins (pl. xiv. 7, 8) on which the ethnic appears for the first time at full length, **KOPINΘIΩN**. The head of Pallas is here of a different type from that with which we have been hitherto familiar on the silver money, and shows the influence of the gold staters of Alexander, on which the helmet is crested and has no leather cap beneath it.

Period II. Circ. B.C. 300—243.

Macedonian types.

To this period, during which Corinth was held by the Macedonians, there would seem to belong, in addition to the silver coins described above, a few bronze pieces (pl. xiv. 9—13), the most characteristic of which is the

§ 7. *Corinth a Roman Colony from* B.C. 46.

Corinth restored as a Roman colony B.C. 46. Bronze coins bearing the names of Duoviri.

From the time of the restoration of Corinth as a Colony by Julius Caesar, B.C. 46, to the reign of Galba, we possess a series of bronze coins bearing the names of the chief annual magistrates of the Colony, the Duoviri. Although this series of coins is unfortunately very imperfect it is nevertheless our only source for compiling the municipal Fasti of the city of Corinth. The coins of this series are for the most part very poorly preserved, and many of them have consequently been misread by Vaillant, Sestini, Mionnet, and others. Some of these erroneous readings I have been able to correct; others, unfortunately, must remain doubtful for the present.

Down to the reign of Claudius it was usual for both the Duoviri to place their names upon the same coin, but from Nero to Galba as a rule one name only occurs at a time, for it would seem that the signature of either of the two was thenceforth sufficient.

Ordinary Duoviri.

The Duoviri held office for one year only, but were eligible for re-election, and indeed were often re-elected, as is proved by the frequent addition of ITER[VM] to their names.

Duoviri Quinquennales.

Whenever the Census was taken the Duoviri who held office in the Census year were entrusted with the function of compiling the register. In these years the ordinary annual Duoviri were entitled Duoviri censoria potestate quinquennales, or simply Duoviri quinquennales.

In the Corinthian Fasti, so far as we can complete them from the coins, the title QVINQ. occurs in four different years, viz. :—

B.C. 38 or 33	C. Pinnius	
M. Antonius.	P. Aebucius (sic)	(Arigoni, Pl. I. 3.)
	II Vir. Quin.	

B.C. 23 ? P. Aebut. Sp. f.
Augustus. C. Iulio Hera.
II Vir. Qui. iter. (Infra, no. 491).

The coin of Augustus bearing the name of Nonius Sulpicius II Vir. Quinq., assigned by Cohen (I. 162, no. 775) to Corinth, belongs to Pella in Macedon. (Imhoof, *Mon. Gr.* p. 86.)

A.D. 22 or 23 ? P. Caninius Agrippa II Vir. Quinq.
Tiberius. L. Castricius Regulus II Vir. Quin.
(Infra, no 523).

As this coin bears the head of Drusus Caesar, the son of Tiberius, who died in A.D. 23, it may very well have been struck in that year or earlier.

A.D. 67 ? C. Julius Polyaenus II Vir. Qui.
Nero. Adve[ntus] Aug. *Galley.*
(Cohen I. p. 306, no. 391).

Ti. Claudius [Optatus] II Vir. Q.
Adv[entus] Aug. *Emperor standing.*
(Ib. 305, no. 387).

F. Domitius II Vir. Qu.
Adve[ntus] Aug. *Galley.*
(Ib. p. 306, no. 397).

this year had something to do with the creation, for that year, of a larger number of magistrates than was customary at Corinth.

Most numismatic writers have asserted that on special occasions the ordinary Duoviri were superseded at Corinth in their right of signing the coinage by the Proconsul of Achaia, who resided at Corinth, for coins are often cited as Corinthian issues which bear the names of Proconsuls. It is now, however, certain that all such are mistaken attributions:—thus the coin bearing the names of Pulcher Procos. and C. Cassius C. f. II Vir, wrongly read by Cohen I. 46, 84, and attributed to Corinth, does not belong to that Colony. The correct reading is given by Imhoof, *Mon. Gr.* p. 231. The letters C. C. R ? were mistaken by the writer, from whom Cohen borrowed his description, for COR. It is uncertain to what town the coin ought to be assigned. Again, the coin bearing the name of Sisenna Procos. (Cohen I. p. 160, 750) belongs, as Borghesi (*Œuvres*, II. 324) has shown, to Sicily, as does also another coin reading Q. Terentio Culleone Procos. (Cohen I. pp. 162, 774), cf. Borghesi II. 208.

Duoviri sometimes replaced by Praefecti.

Sometimes, though rarely, one or both of the Duoviri is replaced by a Praefectus, cf. P. Aebutius Sp. f. and C. Heius Pamphilus, Praefecti iterum, on a coin of Augustus (no. 494) Ti. Caesar II Vir and M. Aemilius Labeo Praefectus on a coin of Tiberius. (Sestini *Mus. Hederv. Europ.* 95).

It would appear that a Praefectus was appointed in place of the second Duovir whenever the Emperor himself or one of the Imperial family accepted the honorary office of Duovir in a colony. A Praefectus or Praefecti might also be appointed in place of the Duoviri when, owing to special circumstances, no election of Duoviri had taken place, or in the unavoidable absence of one or both of the regular magistrates (see Mommsen and Marquardt, *Röm. Alterthümer* IV. p. 169).

eorum nomina. An in difficili rerum statu ad tempus quoddam

, *M. Ant.* 947).

				ob. A.D.
C. MVSSID. PRISCO IIVIR. **C. HEIO POLLIONE ITER.** [Pl. xv. 16.]	C. Mussidius Priscus C. Heius Pollio	II Viri iter.	Heads of *Augustus* *Agrippa Caesar* *Drusus Caesar* *Germanicus* *Tiberius* (Coh. I. p. 206).	 14 23 19
POLLIONE ITER. **F. LABEONE IIVIR.** [Pl. xv. 17.]	C. Heius Pollio F. Labeo	*II Viri iter.*	Head of *Augustus.*	

In the *Revue Numismatique*, 1888, p. 355, M. Svoronos describes a coin almost identical with the specimen in the British Museum, but reading on the obverse **CAESAR**, and on the reverse **LABEONE POLLIONE IIVIR. Q. ITER.** He states that three specimens are known to him, all found in Crete, and he attributes them to the Roman colony of Cnossus. If these coins are indeed Cretan, as their peculiar fabric seems to indicate, the coincidence of the two names with those of Pollio and Labeo on Corinthian coins of about the same period is very remarkable.

I may here mention another coin belonging to the reign of Augustus, which Vaillant (*Num. Col.* 31) and Mionnet (II. 173) have wrongly attributed to Corinth. It bears the names of M. Barbatius and M'Acilius II Viri on the obverse, and of P. Vibius Sac[erdos] Caes[aris] and Q. Barba[tius] Praef[ectus] Pro II Vir[is] on the reverse. The name of the Colony, misread **COR.**, is in reality **C. G. I. P.** (Colonia Gemella? Julia Pariana), see Imhoof, *Mon. Gr.* p. 255. On this coin Eckhel, IV. 478, remarks as follows: "Teste hoc numo certum est, fuisse Corinthi eodem tempore et II viros ordinarios, aliosque dictos praefectos II viros, neque adeo hos tum demum constitutos, cum creari II viri ordinarii non possent." With the restoration of the correct reading, Eckhel's inference naturally falls to the ground.

Vinicius II Vir. Head of *Nero*.
(Vaillant, p. 118).

. Caninius Agrippa II Vir. Heads of *Nero* and *Galba*.

. Caninius Agrippa must have been struck in the year A.D. 68, as
.

I]P· Q· R· and ROMAE ET IMPERIO (Pl. xviii. 7) seem to be
ration of the benefits conferred by Nero upon the Greeks in
en he proclaimed, with much pomp and ceremony, the freedom
ation (Hertzberg, *Gr. Gesch.* ii. 112, *sqq*). This freedom of

No Corinthian coinage between the reigns of Galba and Domitian.

Greece was however but of short duration, for on the accession of Vespasian, B.C. 69, or shortly afterwards, that Emperor withdrew the privileges which Nero had bestowed upon the Hellenes, and reconstituted Achaia as a Senatorial province. At the same time, apparently, he deprived Corinth of the right of coinage, though it is not quite clear on what grounds, as the city was a Roman Colony. It is certain however that no coins can have been struck there between A.D. 68 and the reign of Domitian, A.D. 81—96.

Restoration of the right of coinage by Domitian,

Domitian again reversed the policy of Vespasian, and though he did not go so far as to bestow upon the Greeks of Achaia the gift of freedom and immunity, he lightened their burdens and, as is proved by the numerous decrees in his honour, conferred upon them many benefits. Among these was doubtless the restoration of the right of coinage to the Corinthians who, in his reign, began once more to strike coins, one of which expressly asserts the fact that this was done by the permission of the Emperor **PERM**[issu] **IMP**[eratoris] (Imhoof and Gardner, *Num. Comm. on Paus.* pl. B. xxi).

From this time forth, in gratitude for favours received from this Flavian Emperor, the title Flavia was added to the name of the Colony, which, until Trajan's time, continued to be styled *Colonia Julia Flavia Augusta Corinthus.* From Trajan to Geta, when the coinage finally ceases, the title Flavia is no longer used, the inscriptions being **COL. L. IVL. COR.** or **C.L.I. COR.** (Colonia Laus Julia Corinthus).

but the Duoviri no longer permitted to sign the coins.

The right of coinage conceded by Domitian to Corinth does not appear to have vested, as of old, in the Duoviri, for in no instance do names of these officers occur again on the Corinthian coins. It is probable therefore that the Governor of the Province of Achaia (Propraetor, with the title Proconsul), who resided at Corinth, was directly responsible for the currency. This is however merely a conjecture on my

part, as the coins bear no names or titles except those of the Emperors.

Types of Imperial coins of Corinth.

Of the types of the Corinthian coins in the Imperial period little remains to be said, as they have been already fully discussed by Prof. Gardner in his *Numismatic Commentary on Pausanias*, to which, and to Pausanias, references will be found in the foot-notes. The number of these references proves how rich a fund of material is afforded by the bronze money of Corinth in illustration of Pausanias's passing notes on the works of art extant there in his own day. As Prof. Gardner remarks, in the valuable work above referred to, 'there is no other Greek city whereof the coins give us so extensive information on the subject of temples, statues, legends and cults.'

From Julius Caesar to Galba the types are less interesting mythologically than in the series which begins with Domitian. This however may be in part due to the paucity of coins of large dimensions in the earlier period.

To the end of the reign of Augustus the types chiefly refer either to the worship of Poseidon or to the Bellerophon myth. [Pl. xv.]

Under Tiberius the worship of the Julia Gens prevails, illustrated

The two harbours, Lechaeum and Cenchreae, represented as Nymphs standing in opposite directions, each with a rudder [Pl. xix. 15], or as recumbent male figures with the Acrocorinthus between them [Pl. xxi. 14.]

The statue of Aphrodite of the temple on the Acrocorinthus, holding up the shield of Ares as a mirror, cf. epithet ὡπλισμένη applied by Paus. ii. 5, 1, to the statue [Pl. xix. 12].

The temple of Aphrodite on the summit of the rock containing the above described statue [Pl. xx. 23.]

The Port of Cenchreae with statue of Poseidon in the centre; on either side of the harbour are the temple of Aphrodite and the sanctuaries of Asklepios and Isis [Imhoof and Gardner, Pl. D. 60].

Temple of Poseidon surmounted by Tritons [Imhoof and Gardner, Pl. D. 50].

Ino leaping into the sea with her child Melikertes in her arms [Pl. xxi. 11].

The dolphin swimming to land with Melikertes riding on his back [Pl. xx. 11].

The Altar of Melikertes or Palaemon, on which lies the dolphin with the dead body of the child on his back, often overshadowed by Pine-tree [Imhoof and Gardner, Pl. B. 7].

Circular temple of Palaemon, within which the dolphin and dead child [Pl. xx. 22].

Various sacrifices in honour of the hero Palaemon [cf. Pl. xx. 12, 14].

Isis Pharia [Imhoof and Gardner, Pl. D. 64].

Head of Aphrodite or of Laïs [Pl. xv. 7, 8; xxiii. 11—16].

Tomb of Laïs, consisting of a column surmounted by a Lioness standing over a prostrate ram, cf. Paus. ii. 2, 4 [Pl. xxiii. 11, 12].

Statue of Athena Chalinitis, holding bridle, spear, and shield, Paus. ii. 4, 1. [Pl. xix. 17.]

Fountain Nymph Peirene, seated on rock, holding vase [Pl. xxi. 17, 18].

Agonistic types referring to the Isthmian games [Pl. xx. 3] (Imhoof and Gardner, Pl. C. 41—47).

The above are the types which are the most characteristically Corinthian. Many others might be enumerated, which possess less local interest, though some also of these are probably copies of works of art conspicuous in Roman Corinth.

PART II. COLONIES OF CORINTH, ETC.

Extension of the Corinthian coinage.

Although it is not strictly accurate to classify the numerous series of Pegasos-staters which are without the ♀, the mint-mark of Corinth, under the heading 'Colonies of Corinth,' as some of the cities where these coins were struck were not in any way connected with Corinth, yet it is necessary for purposes of comparison to include them in the same volume as the coins of Corinth itself. All these issues, whether due to direct Corinthian influence, or, as is more frequently the case, merely to the necessities of commerce, should be studied in connection with one another.

The arrangement of the mints is geographical, in the following order:

1. BRUTTII.	Locri Epizephyrii.
	Mesma.
	Rhegium.
	Terina.
2. SICILY.	Eryx.
	Leontini.
	Syracuse.

§ 1. Bruttii.

Locri Epizephyrii.—This town began to coin staters of the Corinthian type about the middle of the fourth century, probably at the same time as Syracuse.

The Locrian staters fall into three distinct groups, which may be dated approximately as follows :—

(i) B.C. 350—332.

From the expulsion of Dionysius II to the expedition of Alexander of Epirus.

ΛO or ΛOK Style fine. Pl. xxiv. 1, 2.

(ii) B.C. 332—300.

ΛOKPΩN Coarser work, usually with symbols under Pegasos, e.g. *Thunderbolt* or *Caduceus*. Pl. xxiv. 3—5.

(iii) B.C. 300—268.

ΛOKPΩN Helmet of Pallas broader and of later style. Symbol on obv., *Thunderbolt*. Pl. xxiv. 6.

To this period may also be assigned the bronze coins (pl. xxiv. 7—10), bearing various symbols and monograms.

Mesma or Medma.—A small place on the west coast of Bruttium, which was captured by Dionysius I B.C. 388, and by him bestowed upon the Locrians.

B.C. 350—300.

Dr. Imhoof-Blumer (*Die Münzen Akarnaniens*, p. 6) has attributed to it staters of the Corinthian type similar in style to those of Locri, but with the letters M and ME. They may be dated circ. B.C. 350–300 (pl. xxiv. 11).

Rhegium.—About the same date Rhegium seems to have struck a few Pegasos-staters, one of which was acquired by Dr. Imhoof at Reggio itself (pl. xxiv. 12).

B.C. 350—300.

Terina also contributed a small issue of the same coins, probably circ. B.C. 325, when Alexander of Epirus released the city for a short time from the yoke of the

Circ. B.C. 325.

Bruttians. The staters bear the mon. Ɛ (See Imhoof, *op. cit.*, p. 7).

§ 2. Sicily.

The date of the introduction into Sicily of the Corinthian stater has been already discussed in my *Coinage of Syracuse*, p. 24 *sqq.* and *Hist. Num.*, p. 156. My attribution of the first Syracusan issues of these staters to Timoleon's time, B.C. 344, has been contested by M. Six (*Num. Chron.*, 1875, p. 28), who prefers to place them some thirty years earlier. Perhaps therefore it is safer to leave the question of the exact date an open one. The inscriptions ΛΕΟΝΤΙΝΟΝ and ΣΥΡΑΚΟΣΙΟΝ on some of the earliest specimens seem to point to the close of the fifth century as the date of the first issue of Corinthian staters in Sicily. On the other hand this may be an adjectival form, as the art on the coins in question seems to be more in the style of the middle of the fourth than of the end of the fifth century. There is in fact little or no difference in style between the staters reading ΣΥΡΑΚΟΣΙΟΝ and those with ΣΥΡΑΚΟΣΙΩΝ.

B.C. 344?

Eryx.—A remarkable instance of the influence of commerce upon currency is afforded by the Pegasos stater

B.C. 344?

LEONTINI AND SYRACUSE.—The earliest issues of Corinthian staters in Sicily, which I assume to belong to the age of Timoleon's conquests in the island, are therefore those of Eryx with ארך, of Leontini with ΛΕΟΝΤΙΝΟΝ (pl. xxv. 1) and of Syracuse with ΣΥΡΑΚΟΣΙΟΝ (pl. xxv. 2) and also ΣΥΡΑΚΟΣΙΩΝ (pl. xxv. 3, 4).

B.C. 344?

Of these three towns Syracuse alone continued at intervals to strike money of the Corinthian type. This currency, here as everywhere else outside the limits of the Corinthian territory, was of an intermittent nature, struck now and again as occasion required, to meet the demands of foreign trade chiefly in the direction of the coasts of Illyria, Epirus, Corcyra, and Acarnania, where, as we shall presently see, the Corinthian types had at a comparatively early period assumed the character of a quasi-federal and international currency. The later Syracusan issues may be dated as follows :—

B.C. 317—306.

In this period the following changes were introduced :—

(*a*) The head of Pallas, hitherto occupying the reverse or concave side of the coin, is now placed on the obverse.

(*β*) The helmet is crested and ornamented at the back with a griffin.

(*γ*) The inscription ΣΥΡΑΚΟΣΙΩΝ is transferred to the reverse, now the Pegasos side of the coin.

(*δ*) The Triskelis, the symbol of Sicily, occupies a conspicuous position in the field (pl. xxv. 5—7).

As the Triskelis does not occur on coins of Syracuse before the reign of Agathocles, there can be no doubt that this series belongs to his time.

B.C. 306—289 or later.

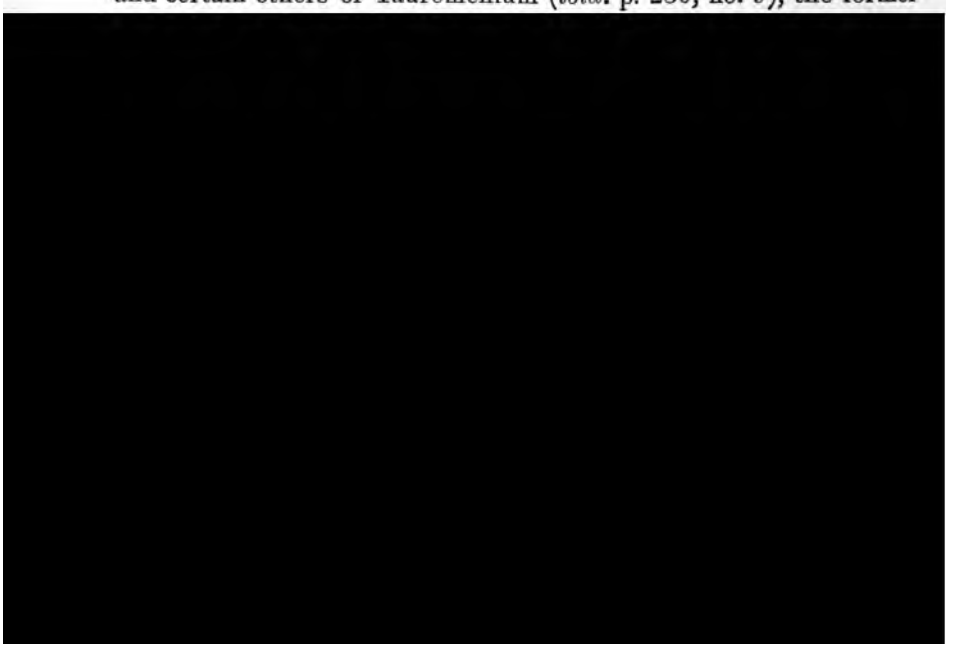
In B.C. 307 Agathocles adopted the regal title, and henceforth his coins are either uninscribed or bear his own name. The legend

ΣΥΡΑΚΟΣΙΩΝ does not again occur on coins of Corinthian type issued in Sicily.

Another change introduced in B.C. 307 into the coinage was the abandonment of the Attic standard in favour of the Sicilian. The weight of the Pegasos coins was consequently reduced from 135 grs. to 108 grs., or from 10 litrae to 8.

The pieces of 8 litrae (pl. xxv. 8—10) may be distinguished from the staters as introduced by Timoleon? (pl. xxv. 2—4), and from those of the second issue in the early part of the reign of Agathocles (pl. xxv. 5—7), not only by their diminished size and weight, but in the following particulars—(i) The helmet of the goddess, though plain and without crest as on the staters of the earliest issue, has no covering for the ear, which is visible and has an earring. On some specimens the flap of the leather cap beneath the helmet covering the neck is also wanting (pl. xxv. 10); (ii) the Pegasos on the reverse differs from that on the pieces of the previous issue, in that both wings are often visible.

In the following catalogue I have not included certain coins of Hiero II (B.C. 275—216), *B. M. Cat.*, Sicily, p. 209, nos. 522, 523, and certain others of Tauromenium (*ibid.* p. 230, no. 9), the former



In part contemporary with the staters of the Corcyrean standard, but commencing somewhat later, circ. B.C. 350, and extending down to circ. B.C. 300, are certain series of Corinthian type and weight which, as in Southern Italy and Sicily, were issued rather for foreign commerce than for internal trade. The long established popularity of the Corinthian coinage and its wide-spread use in all the sea-ports of the western regions of Greece probably rendered its adoption here as elsewhere, when not due to direct Corinthian influence, rather a matter of necessity than of choice.

B.C. 350.

APOLLONIA.—The only stater of this town in the British Museum may be dated circ. B.C. 350. There can be little doubt as to its attribution, as it reads ΑΓΟΛ and has the lyre for symbol (pl. xxvi. 1).

(i) B.C. 450.

EPIDAMNUS—DYRRHACHIUM.—The earliest known stater of this city appears to belong to the middle of the fifth century. On the *obv.*, beneath the Pegasos is the letter Ε and a club. The head of Pallas on the reverse is not of archaic style. It is engraved in Lagoy *Mélanges de Numismatique*, 1845 (pl. ii. 3).

(ii) B.C. 350—300.

The series with the name Dyrrhachium extends from about B.C. 350—300. The staters are inscribod Δ, ΔΥΡ, or ΔΥΡΡΑΧΙΝΩΝ or Δ on *obv.*, and Ξ (Epidamnus ?) on *rev.* The club is a constant symbol on the *rev.*, and there is in addition usually a dolphin. The only specimen on which the club is wanting is pl. xxvi. 8, and as this coin differs altogether in style from the rest it is quite possible that it is not a coin of Dyrrhachium but of Corinth itself, the ♀ having been inadvertently omitted from under the Pegasos. It may be compared with the drachms figured on pl. x. 13, 14, on which the letter Δ is also enclosed in a wreath.

The drachms of Dyrrhachium have a head of Herakles on

(iii) B.C. 300—229. the obverse (pl. xxvi. 9—10). They seem, speaking generally, to be of later style than the staters. I would attribute them conjecturally to the period between B.C. 300 or 250 and 229, when Dyrrhachium and Apollonia were taken under Roman protection.

The subsequent coins of these cities are not of the Corinthian type.

The drachms with the head of Herakles appear to have been largely imitated by the Illyrians of the interior, for there are many which are of very light weight and which bear no evidence of having been struck at Dyrrhachium. Of these one specimen indeed (p. 103, no. 39) bears the obelisk, which is characteristic of certain coins of Ambracia and Apollonia.

§ 4. Epirus.

The Corinthian coinage of Epirus consists (i) of the rich and varied series of the Corinthian colony of Ambracia, pl. xxvii. xxviii. and xxix. 1—11; (ii) of a single issue of staters bearing on the obverse the monogram [illegible] if this is to be interpreted AΓEI[PΩTAN] and on the *rev.* A (Ambracia ?) (pl. xxix. 12); (iii) of a few other

was put to the sword by Demosthenes, must have crippled the commerce of Ambracia for some time after this, but the numerous series of its coins prove that from the latter part of the fifth century down to the middle of the fourth the trade of Ambracia must have been in a flourishing condition.

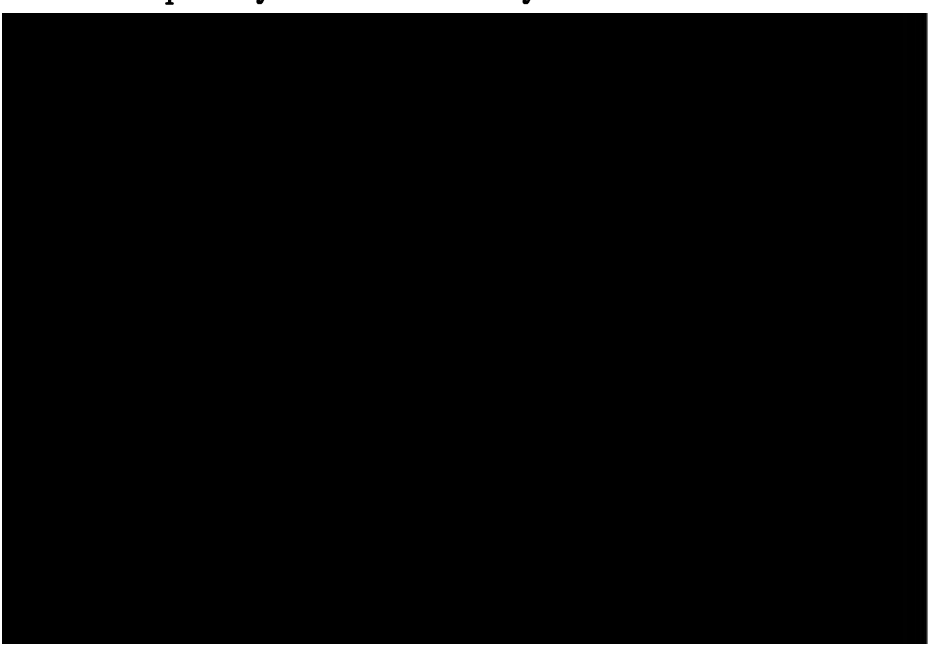
The coins bear either the full legend AMBPAKIOTAN, AMBPAKIΩTAN, or AMΓPAKIΩTAN, or merely the initial letter A. Among the latter are some specimens which may belong to the Amphilochian Argos, but as I see no sure means of separating them from the rest I have thought it better to place all together under Ambracia. The Ambraciot staters are remarkable among all those of Corinthian type for the variety and elegance of the symbols which distinguish the successive issues. Of these I may here mention (pl. xxvii. 4.) the beautiful and interesting figure of a girl playing at the game of Kottabos, or rather balancing the scale or πλάστιγξ on the point of the rod for the players to throw their wine at. Half way up the rod is a basin κοττάβειον to catch the wine or perhaps the scale itself as it fell on being struck by the successful thrower. (*Helbig Mittheil. des röm. Instituts*, 1886 p. 222 *sq.*) Pl. xxvii. 5 represents, apparently, a naked athlete. Pl. xxviii. 7, 10, 11, youthful male winged figures, Erotes? one of whom rides on a dolphin and clasps one knee, a type adapted from the coins of Tarentum. Pl. xxviii. 9, Young horned River-god Arachthus with his name in full ΑΡΑΘΘΟΣ seated on a bull's head, also clasping his knee. Pl. xxviii. 14, Naked male figure, perhaps Ambrax, the traditional founder, seated on rocks, while on the other side of the principal type a swan swims to the left, this type symbolizing perhaps the city of Ambracia, the acropolis of which occupied a rocky height at the foot of which the river Arachthus, indicated by the swan, flowed through a fertile plain towards the Ambracian gulf. The fore-part of a butting-bull (pl. xxvii. 15), and the bearded head with bull's horns (pl. xxviii. 1, 2) probably also symbolize the river Arachthus.

The careful and sometimes elegant style of most of these little symbols is sufficient to prove that art was in a flourishing state in this western city. The coins of the mother-city, Corinth itself, offer nothing which can be compared with them in fanciful variety of detail.

Pl. xxix. 11, which shows a naked youth seated on a low stool and examining the hoof of Pegasos, seems to have been suggested by a contemporary didrachm of Tarentum (*Hist. Num.*, p. 51, fig. 31), and is important as again indicating a familiarity with Tarentine coins, which points to commercial relations between the two cities. The obelisk (pl. xxix. 6) which occurs as a principal type on later coins of the city (*Hist. Num.*, p. 270, fig. 181) is the sacred conical stone *βαιτύλιον* of the Apollo *Ἀγυιεύς* of Ambracia (Preller, *Gr. Myth.*, 4th ed., i. 276).

Between the time of Philip of Macedon, who threw a garrison into Ambracia (Diod., xvii. 3), and that of Pyrrhus no staters seem to have been struck at that town. The coins of later style, which are apparently contemporary with the money of Pyrrhus, and which were probably struck after the city of Ambracia had been made

(iii) After B.C. 295.



§ 5. Corcyra.

Corcyra.—The hostile relations and trade jealousies which always existed between Corinth and Corcyra, the most important of all her Colonies, may perhaps be one of the causes why, in the matter of currency, Corcyra long stood aloof from the monetary agreement which seems to have existed between Corinth and her other Colonies—Ambracia, Anactorium, and Leucas.

(i) B.C. 338—250.

From the earliest times down to the occupation of Corinth under Philip, B.C. 338, the coinage of Corcyra differed not only in type but in standard from that of the mother-city. About that time, however, it would seem that Corcyra found it necessary to join the Acarnanian monetary league, of which Leucas was the leading state, and to contribute in some small degree to the mintage of Pegasos-staters which had then become the almost universal medium of exchange in the markets of the west.

The Corcyrean issues of Pegasos-staters extend perhaps down to about B.C. 300 or 250. They bear the letters K, ⋔, ⋔, KOP, or KOPKYPAIΩN (Imhoof Coll.). The letter Λ on the reverse of some specimens (pl. xxx. 2) seems to point to an alliance with Leucas. The amphora and the vine-leaf as symbols in the field are characteristic emblems of an island whose trade consisted largely in wine.

Corcyra appears to have been sometimes content with countermarking coins struck at other mints with her own monogram (pl. xxx. 4). No. 7, p. 112, is a coin of Corinth (series ♀—I, symbol, star) issued at a somewhat earlier date, on which the ♀ has been obliterated by the monogram ⋔.

(ii) After B.C. 229.

The Drachms with Corinthian types—*obv.*, Head of Aphrodite, *rev.*, Pegasos—which have already been catalogued (*Thessaly—Aetolia*, p. 137 *sq.*), belong to the period after B.C. 229, when Corcyra, under Roman pro-

tection was still allowed to issue her own money (*op. cit. Introd.* p. xlix).

§ 6. Acarnania.

B.C. 350—250.

Alyzia was a Corinthian colony on the western coast of Acarnania, possessing a harbour and a sanctuary dedicated to Herakles. The town does not appear to have coined money before about the middle of the fourth century or after the middle of the third. Inscription, ΑΛΥΞΑΙΩΝ, ΑΛΥ, or Α (Imhoof, *Akarnania*, p. 47). The symbols refer for the most part to the worship of Herakles.

(i) B.C. 500—450.

Anactorium.—An important town near the mouth of the Ambracian gulf, a few miles from the promontory of Actium, was colonized jointly by Corcyreans and Corinthians. It was one of the few places which, in the archaic period (B.C. 500—450), struck staters of Corinthian types, the other cities being Corinth (with letter Ϙ), Leucas (with Λ), Ambracia (with Α), and Epidamnus (with Ε). The specimens struck at Anactorium bear the digamma Ϝ (cf. Imhoof, *Akarnania*, p. 57). There is no specimen of this issue in the

the ethnic on the reverse is inscribed at full length **ΑΝΑΚΤΟΡΙΕΩΝ** or **ΑΝΑΚΤΟΡΙΩΝ**, both forms occurring on coins which are clearly contemporary (pl. xxxi. 13, 14). On other specimens the legends **ΑΚΤΙΟ** and **ΑΚΤΙΟΥ** (pl. xxxi. 4, 5) are met with, inscriptions which, as Dr. Imhoof (*op. cit.* p. 61) has pointed out, cannot refer to a town of Actium, but to the temple of Apollo Ἄκτιος, which stood on the Actian promontory in the territory of Anactorium. This legend is sometimes written round the head of Pallas, sometimes round that of Apollo. The feminine form **ΑΚΤΙΑΣ** (pl. xxxi. 6) appears to be a nominative case, and to be the name of the goddess of Victory in the Actian games, as it occurs only in conjunction with a female head resembling that of Nike.

Legends ΑΚΤΙΟ, ΑΚΤΙΟΥ and ΑΚΤΙΑΣ.

Among the more remarkable symbols on the coins of Anactorium are pl. xxxi. 1, 2, Pan with goat's head and legs, holding a branch over his shoulder; cf. Herod ii. 46, γράφουσί τε δὴ καὶ γλύφουσι οἱ ζωγράφοι καὶ οἱ ἀγαλματοποιοὶ τοῦ Πανὸς τῶγαλμα κατά περ Ἕλληνες, αἰγοπρόσωπον καὶ τραγοσκελέα; see also Wieseler, *de Pane et Paniscis*, Göttingen, 1875. Pl. xxxi. 8, Statue of Apollo on basis, holding bow and patera. Pl. xxxi. 9, Nike carrying taenia. Pl. xxxi. 12, Uncertain object, possibly a sort of funnel or filter with a mouth like an inverted cone, to the bottom of which hangs a long bag. Pl. xxxi. 19, Temple-key with fillet attached. Pl. xxxii. 12, Uncertain object somewhat resembling a strap or leather thong, for other varieties of which see Imhoof, *Akarnania*, p. 76.

Remarkable symbols.

Of the remaining symbols, which I need not here enumerate, the majority seem to refer to the cultus of Apollo.

The following magistrates' initials, &c., occur on coins of Anactorium, which I would place between B.C. 350 and 300:—

Magistrates' initials.

⋛—A and HA			[Pl. xxxi. 1—3]
EY			[Imhoof, no. 43]
ΛΩΤΟ?	symbol,	Nike	[Pl. xxxi. 9]
EΓI	„	Shrimp	[Pl. xxxi. 10]
„	„	Gorgoneion	[Pl. xxxi. 11]
EYAN	„	Ithyphallic term of Hermes	[Imhoof, no. 50]
Ξ	„	Tripod	[p. 117, no. 29]
⋚	„	Tripod	[Pl. xxxii. 1]
⋚I	„	Wreath	[Imhoof, no. 54]
⋚	„	Wreath	[Pl. xxxii. 5]

The following classes, bearing the abbreviated names of one, two, or even of three magistrates, are distinctly of later style than the rest, and seem to belong to the first half of the third century. Dr. Imhoof suggests that these magistrates may be officials of the Acarnanian League, as some of them recur on coins of Thyrrheium and Leucas after B.C. 300, when Stratus had fallen into the hands of the Aetolians and Leucas had taken its place as the chief city of the League:—

ΚΛΕ—ΑΓ	Symbol,	Bucranium	[Pl. xxxii. 9]
ΚΛΕΟ	„	Bucranium	[Imhoof, no. 94]
ΛΥΣ—ΑΓ	„	Thymiaterion	[Pl. xxxii. 10]

[redacted]

Livy (xxxviii. 10) 22 M.P. (= 176 stadia) from Ambracia. Its original inhabitants were Amphilochians of Epirote or Acarnanian origin. Shortly before the Peloponnesian war some colonists from Ambracia who had been admitted by them as fellow-citizens seized the town and expelled the Amphilochians.

In B.C. 432 the expelled Amphilochians, with the assistance of the Athenians, made themselves again masters of the town which they henceforth continued to hold in spite of two fresh attempts of the Ambracians, B.C. 430 and 426, to regain possession of the place. Some time after B.C. 300 (probably circ. B.C. 278), Argos, with its territory, as well as Ambracia, fell into the hands of the Aetolians.

B.C. 350—270.

The coinage of Argos begins about the middle of the fourth century and probably comes to an end circ. B.C. 270. It falls into two principal classes, of which the earlier is distinguished by the inscriptions **ΑΡΓΕΩΝ, ΑΡΓΙΩΝ, ΑΡΓΕΙΩΝ, ΑΡΓΕΙ, ΑΡ,** &c. (pl. xxxiii. 1—8), the later by those of **ΑΜΦΙΛΟΧΩΝ, ΑΜΦΙΛΟ, ΑΜΦΙ, ΑΜ,** &c. (pl. xxxiii. 9). It would thus appear that the name of the town, Argos, was superseded by the more comprehensive ethnic of the whole territory of the city.

The leading symbol on the coins of the earlier period is a complete figure, a forepart, or a head only, of a dog, though what particular dog is here intended we are at a loss to determine, for various dogs in Greek mythological tales bore the name of Argos, *e.g.* the dog of Odysseus (*Od.* xvii. 292), one of the dogs of Aktaeon (Apollod. iii. 4. 4), and according to one version of the tale, the dog set to watch over Io (Hipponax, fr. 1 Lyr. gr. ed. Bergk, p. 588).

Very probably the symbol on the coins was quite unconnected with any local tradition and merely suggested by the name of the town, the word *ἀργός* being in Homer a common epithet as well as a name applied to dogs as *κύνες ἀργοί, ἀργίποδες, πόδας ἀργοί,* &c.

The other symbols are a Thunderbolt (Imhoof, *op. cit.* 1); Tripod (pl. xxxiii. 2); Grain of corn (pl. xxxiii. 3); Dove flying (pl. xxxiii. 4); Crested helmet (pl. xxxiii. 5, 6); Sepia (pl. xxxiii. 7); Shield with straps (pl. xxxiii. 8). On the later series with the legend **ΑΜΦΙΛΟΧΩΝ**, &c., the symbols are:—Lance-head (Imhoof, 25); Javelin (pl. xxxiii. 9); Spear (Imhoof, 32 *sqq.*); Large knife? (Imhoof, 40); and Shield in ivy-wreath and lance-head (Imhoof, 41).

ASTACUS.—This town was a Cephallenian colony situate at the head of the long gulf now called Dragamesti, on the west coast of Acarnania. Circ. B.C. 431 we hear of it from Thucyd. ii. 30 as under the government of a Tyrant named Euarchos, who was expelled by the Athenians.

Of the history of Astacus after B.C. 429, when it is again mentioned by Thucydides (ii. 102), nothing seems to be known.

Astacus coined Pegasos-staters apparently on one occasion only, probably about the middle of the fourth century. The symbol behind the head of Pallas is the

B.C. 350.

ἀστακός or Cray-fish, a *type parlant* which, as at Astacus in Bithynia (*Hist. Num.*, p. 437), may have been adopted simply as a pun upon the name of the town, or we may go back a step

B.C. 295—272, we may safely infer that the Acarnanian coins with this symbol belong to the first half of the third century.

ECHINUS?—Echinus was a small place on the southern shore of the Ambracian gulf, about two miles north of Thyrrheium, of which it may have been the port. The only coin which has been attributed to this town is the stater bearing the letter E and a Fish-hook (pl. xxxiii. 12). The style of this piece indicates the period between B.C. 300 and 250, and if it had had Λ under the Pegasos instead of E it would have fallen naturally in the series of Leucas (cf. pl. xxxvi. 21), where the Fish-hook also occurs accompanied by the letters EY. The Leucadian coin appears, however, to be somewhat earlier in style than the pieces here conjecturally assigned to Echinus.

B.C. 300—250.

LEUCAS.—Leucas, like its neighbour Anactorium, was colonized from Corinth and Corcyra. The town stood near the northern extremity of the island, or rather peninsula, connected with the mainland of Acarnania by a narrow sandy isthmus, through which a canal had been cut by the original colonists. This canal, owing to its having at an early date been silted up with sand, was not navigable during the period with which we are now dealing.

Leucas probably remained longer than any other Corinthian colony in intimate political relations with the mother-city, for it continued to strike not only the staters but also the smaller denominations (drachms, triobols, obols, &c.) with Corinthian types, at least down to the time when Corinth herself became dependent upon Macedon, B.C. 338.

In the Lamian war, B.C. 323, we find Leucas with Alyzia taking sides with the Athenians (Diod. xviii. 11), and about B.C. 300, or perhaps earlier, when Stratus, hitherto the chief city of the Acarnanian League, fell into the hands of the Aetolians, Leucas took its place as the central mint of the Acarnanian Confederacy. During all this time, and probably for another half century, down

to B.C. 250, the coinage of Corinthian staters at Leucas seems to have been continued, though perhaps not without temporary intermissions, the last issues bearing evidence of having been struck in the name of the Acarnanian League, for they have the letters AK in monogram under the Pegasos, instead of the letter Λ (pl. xxx. 5, 6). About B.C. 250 the weight of the Corinthian stater fell suddenly from 130 grs. to circ. 106 grs., and it is probable that at the same time the place of mintage was removed from Leucas to Thyrrheium on the mainland, which rose to greater importance in the latter half of the third century.

In B.C. 229, if not earlier (see *Cat. Thes.* Introd. p. lii), the coinage of Corinthian staters, whether at Thyrrheium or Leucas, came completely to an end. An entirely new Federal Acarnanian coinage in gold, silver, and bronze was then inaugurated, of which the place of mintage was probably Leucas. These coins, which bear the inscription ΑΚΑΡΝΑΝΩΝ and the name of the Strategos of the League on obverse or reverse, seem to have lasted down to B.C. 167, when Leucas was separated by the Romans from the Acarnanian Confederacy. It does not appear, however, that the city was even then deprived of the right of coinage, but merely

(i) *Circ.* B.C. 500—430.

(i) B.C. 500—430.

Staters of archaic style (pl. xxxiv. 1) similar to those of Corinth (pl. ii. 3—7), but with the letter Λ or ʌ beneath the Pegasos, who is bridled and has curled wings. Cf. also staters of this period struck at Ambracia (pl. xxvii. 1), Epidamnus (supra, p. liii), and Anactorium (Cadalvène, *Recueil*, ii. 29). The earlier coins of this class have no symbols in the field, but on one of the later specimens is an ivy-leaf (pl. xxxiv. 2). The helmet has no leather cap beneath it.

(ii) *Circ.* B.C. 430—400.

(ii) B.C. 430—400.

On the earlier staters of this period the Pegasos is bridled and has the wings curled as in Period I. (pl. xxxiv. 4, 6). Gradually the attitude of the animal becomes freer and less stiff (pl. xxxiv. 7, 8), and towards the end of the period the pointed form of wing replaces the curved one (pl xxxiv. 10, 11). Inscription, Λ, ʌ, or ΛΕΥ.

On the reverse the head of Pallas is always enclosed in a more or less well-defined incuse square; the hair of the goddess hangs in loose locks, and the helmet almost always shows the flap of the leather cap over which it was worn. Sometimes, though rarely, the helmet is crested (pl. xxxiv. 4 and Imhoof, *Akarnania*, pl. iii. 9). The letter Λ or ʌ is usually repeated from the obverse, but it is sometimes replaced or accompanied by other letters, *e.g.*, F (*Num. Zeit.*, 1871, pl. x. 22), Δ (p. 126, no. 18), or A (p. 126, no. 21).

Symbols now become more frequent, viz. Human eye (Postolacca, 558); Flying bird (Imhoof, pl. iii. 9); Phiale; Bow; Vine-branch; Two olive-sprays, &c. (pl. xxxiv. 7, 8, 9, 12).

Drachms of this period occur (pl. xxxvii. 1, 2), and smaller divisions, Triobols, Diobols, Trihemiobols and Obols, of which last two denominations some specimens must be assigned to a still earlier date (pl. xxxvii. 13, 15).

(iii) *Circ.* B.C. 400—330.

(iii) B.C. 400—330.

The coins of this period, which are very plentiful, may be distinguished from those of an earlier date by the absence of all traces of an incuse square, the form of the die used for the reverses being henceforth circular; cf. pl. xxxiv. 13 with the previous specimens on the same plate. The Pegasos, as a general rule, has pointed wings; occasionally, however, as on pl. xxxv. 13, 15, the curled wing of the earlier periods is reverted to. The letter Λ is always present under the Pegasos, and is frequently also repeated on the reverse, though the ethnic is sometimes here written at greater length ΛΕΥ or ΛΕΥΚΑΔΙΩΝ.

In addition to the letter Λ, &c., other letters sometimes occur, *e.g.*, on *obv.*, Ε, Θ; on *rev.*, Γ, Λ, Σ.

The symbols in the field of the reverse are very numerous. In addition to those mentioned in this Catalogue others will be found in Postolacca's and Imhoof's lists, but as the coins described are not usually engraved, it is seldom possible to distinguish accurately to what period they ought to be assigned.

In addition to the stater the following denominations are

reverse, *e.g.* A, Α, Α, Λ, Ξ, ΑΡΙ, ΕΥ, ΙΩ, ΣΩ, ΤΙ, ΓΕ. It has already been remarked (supra, p. lx), that some of these names occur about the same period on coins of Anactorium and Thyrrheium, and that they may stand for the names of officials of the Acarnanian League.

Among the latest staters struck in Leucas may perhaps be included the coins issued in the name of the Acarnanian League, with the monogram Α under the Pegasos (pl. xxx. 5, 6).

METROPOLIS.—Metropolis, the modern Lygovitzi, was a small town in the interior of Acarnania, situate at the foot of a steep hill overlooking Lake Rynchus. The staters which, on account of the monogram Μ, have been attributed to this place (pl. xxxviii. 1) belong to the earlier half of the third century. The symbol on the reverse, a round Macedonian shield, occurs also on contemporary staters of Coronta (supra, p. lxii). The shield on the stater of Metropolis is ornamented with a figure of the Macedonian Athena Alkis, a valuable indication of date, for this type of the fighting Pallas never occurs on coins before circ. B.C. 316, when it was adopted by Ptolemy Soter, and as it is afterwards seen on coins of Pyrrhus, B.C. 295—272, and Antigonus Gonatas, B.C. 277—239, we may safely assign the stater of Metropolis to about the same period.

B.C. 300—250.

The countermark Μ on the specimen described in this Catalogue occurs also on certain coins of Anactorium and Thyrrheium, and probably stands for Ambracia, which city when she ceased to strike money in her own name, circ. B.C. 295, may have countermarked the issues of her Acarnanian neighbours.

THYRRHEIUM.—Thyrrheium was a populous and important city a few miles south of the Ambracian gulf. It was probably a Corinthian colony. The series of its staters covers a period, with probable intermissions, of about a century (circ. B.C. 350—250). There are also some

(i) B.C. 350—250.

coins of reduced weight, 106 grs., of very late style, without the name of Thyrrheium, but with the head of the river Acheloüs in the field, which on that account have been conjecturally attributed to Thyrrheium. They belong probably to the time when that city was one of the most important towns of the Acarnanian League, circ. B.C. 250—167 (pl. xxx. 7, 8). The head of Acheloüs was the symbol of the Acarnanian Confederacy, and was, after B.C. 167, adopted by Thyrrheium as the type of her autonomous coinage (*Hist. Num.*, p. 282).

(ii) B.C. 250—167.

Some of the staters of Thyrrheium bear magistrates' initials, and among these there are two, viz., Α and ΕΠΙ (pl. xxxviii. 10), which occur also on coins of Anactorium, and one, Α, which is met with also at Leucas. From this we may infer that they are the names not of municipal magistrates but of officers of the League.

UNCERTAIN MINTS.—In an extensive series of coins such as this of the Pegasos-staters there must always be a few which cannot be attributed with certainty. Some of these are figured on pl. xxxix. Nos. 1 and 2 seem to be of Italian or Sicilian fabric, and Rhegium and Locri might be suggested as possible mints. No. 3 I would assign

Doubtful attributions.

Warrior, naked.—Corinth, 56.
Wheel.—Corinth, 25.
Wreath.—Corinth, 22, 32 *sq.*, 54 *sq.*; Locri, 96; Dyrrhachium, 102; Anactorium, 121; Leucas, 128.

Wreath, enclosing tripod.—Anactorium, 118.
Wreath, in which, A.—Leucas, 132.

Z.

Zeus standing, holding thunderbolt and transverse staff.—Corinth, 16, 37, 147.

Zeus, hurling thunderbolt. — Ambracia, 107.

Zeus, seated, holding thunderbolt and eagle.—Corinth, 33.

INDEX IV. A.

KINGS AND RULERS.

There are no names of Greek kings or Rulers on the coins described in this volume.

INDEX IV. B.

MAGISTRATES' NAMES ON AUTONOMOUS COINS.

A.

ΑΒΡ.—Argos Amphilochicum, 123.

ΑΡΙ.—Anactorium, 121.

Ε.

ΕΓΙ. — Anactorium, 116, 120; Thyrrheium, 140.

Κ.

ΚΛΕ.—Anactorium, 119.

Λ.

ΛΥΣ.—Anactorium, 120.

ΛΩΤΟ.—Anactorium, 116.

INDEX IV. c.

MAGISTRATES' NAMES ON IMPERIAL COINS.

There are no magistrates' names on the Imperial coins described in this volume, except those of Roman Duoviri, etc., for which see Index V.

INDEX V.

ROMAN MAGISTRATES' NAMES.

A.

M. AC[ilio] CANDIDO IIVIR.—Corinth, 67 *sq.*
P. AEBVTIO IIVIR.—Corinth, 59.
P. AEBVT. SP. F. II.VIR. QVI. ITER.—Corinth, 59.
P. AEBVTIO SP. F. PRF. ITER.—Corinth 59.
[L .]CERTO AEFICIO IIVIR.—Corinth, 58.
M. ANTONIO HIPPARCHO IIVIR.—Corinth, 61.
M. ANT. HIPPARC. IIVIR. ITER.—Corinth, 61.
L. ARRIO PEREGRINO IIVIR.—Corinth, 63, *sq.*

B.

M. BELLIO PROCVLO IIVIR.—Corinth, 65.

F.

Q. FVL[vio] FLACCO IIVIR.—Corinth, 69.
L. FVRIO LABEONE IIVIR.—Corinth, 62 *sqq.*

H.

C. HEIO PAMPHILO PRF. ITER.—Corinth, 59.
C. HEIO PAM. IIVIR.—Corinth, 60.
C. HEIO POLLIONE ITER. [IIVIR].—Corinth, 62.

I.

[C.] INST[eio] IIVIR.—Corinth, 64.
— NS. IIVIR.—Corinth, 65.
C. IVLIO HERA.... IIVIR.QVI. ITER.—Corinth, 59.
C. IVLI[o] NICEP[horo] IIVIR.—Corinth, 58.
C. IVLIO $\bar{\text{I}}$IVIR.—Corinth, 58.
C. IVLIO POLYAENO IIVIR.—Corinth, 70.

M.

P. MEMIO CLEANDRO IIVIR. QVI.—Corinth, 70.
C. MVSSID[io] PRISCO IIVIR.—Corinth, 62.

N.

M. NONIO BASSO IIVIR. ITER.—Corinth, 61.

O.

— OCTAVIO LVSCINO ITER. IIVIR.—Corinth, 66.

P.

L. PACO[nio] FLAM[inino] [IIVIR.]—Corinth, 66.
C. PINNIO IIVIR.—Corinth, 59.
CN. PVBL[icio] REG[ulo] [IIVIR.]—Corinth, 66.

R.

L. R[utilio ?] PISONE IIVIR. QVI.—Corinth, 71.
L.RVTILIO PLANCO IIVIR.—Corinth, 60 *sq.*

S.

C. SERVILIO C.F. PRIMO IIVIR.—Corinth, 61.

T.

P. TADI[o] CHILO[ne] IIVIR.—Corinth, 58.

V.

A. VATRONIO LABE[ONE IIVIR.]—Corinth, 60 *sq.*
P. VE[ntidio ?] FRONTONE IIVIR.—Corinth, 67.
P. VIPSANIO AGRIPPA IIVIR.—Corinth, 65.

INDEX VI.

ENGRAVERS' NAMES.

There are no names of engravers on the coins described in this volume.

INDEX VII.

REMARKABLE INSCRIPTIONS.

α. GREEK.

A.

ΑΚΤΙΑΣ.—Anactorium, 115.
ΑΚΤΙΟ.—Anactorium, 115.
ΑΡΑΘΘΟΣ.—Ambracia, 107.

Δ.

Δ (Diobol).—Corinth, 9.
ΔΙΟ (Diobol). — Corinth, 12; Leucas, 136.

T.

ΤΡΙΗ (Tribemiobol). — Corinth, 10; Leucas, 137; Uncert., 142.

Φ.

ΦΡΥΓΙ (Φρυγι!) (*Graffito*).—Corinth, 22.

β. ROMAN.

C. I. L. COR. — Corinth, 79, 81.
C. L. I. COR. — Corinth, 72 *sqq.*
COL. IVL. COR.—Corinth, 74.
COL. IVL. FLAV. COR.—Corinth, 72 *sq.*
COL. IVL. FLAV. AVG. CORINT.—Corinth, 72 *sq.*
COL. L. IVL. COR.—Corinth, 74, 92.
CORI[NT] COL. L. I. — Corinth, 74.
